

- A significantly stronger clamp sheet
- High impact and tear resistance
- Easier to use and longer lasting
- High resistance to weathering
- Consistent appearance throughout use
- ADAS tested
- Made in the UK

# VISQUEEN

## AGRI-S

# The toughest Silage Sheet available

Advances in polymer technology have enabled bpi.agri to develop a new super high strength film: Visqueen Agri-S. Its unique polymer formulation makes it much stronger than previous clamp sheets providing strength and resistance to the tough farm working environment.

Covered by a full 12 months warranty and backed by an experienced team of support staff you can be confident that Visqueen Agri-S will perform consistently to help produce high quality silage.

appearance for the full time in use. It won't develop "clear spots" and its appearance will be constant.

#### Weather resistance

With increased resistance to weathering, Visqueen Agri-S protects against all weather conditions. UV inhibitors provide full protection from sunlight during period of use.

#### ADAS tested

Visqueen Agri-S has been extensively tested at the independent ADAS consultancy as well as in 'live' trials on selected UK farms to prove its superior strength characteristics.

#### British made

Visqueen Agri-S, the established UK brand, provides the security and confidence earned from years of experience in British farming. It remains the only silage sheet manufactured in the UK and by far the most widely used.

#### Technical Specification:

Width (m)	Length (m)
4	50
8	25 / 50
9.2	50
11	25 / 42
12.8	20 / 25 / 36
14	30
16	30
17.4	25
18.3	25
Double thickness:	
8	28
11	28

#### Strength

bpi.agri uses the finest raw materials in manufacturing and this, along with their technical expertise makes Visqueen Agri-S a far stronger sheet.

When sheeting down the clamp, cheaper silage sheets are often damaged in the process. The high strength and impact features of Visqueen Agri-S help prevent this happening due to the improved tear resistance. Even if it is punctured, the superior tear strength of Visqueen Agri-S helps prevent splitting any further along the rip. Being a significantly stronger product makes Visqueen Agri-S easier to use and longer lasting thereby saving money.

#### Lighter

Visqueen Agri-S is lighter than conventional sheeting and therefore easier to handle. Its lighter weight also gives it the added environmental advantage of being easier to dispose of.

#### Appearance

Visqueen Agri-S has excellent opacity – the black colour and thickness of the sheet keep its
